The Quest story... the largest network in Australasia

Nearly 20 years ago, Quest developed an accommodation alternative that changed the travel industry... by introducing the concept of the stylish, roomy and well appointed Serviced Apartment.

Today, Quest has built the largest network of serviced apartments with properties across Australia, New Zealand and Fiji.

Quest's success has been driven by an awareness of the changing needs of the corporate traveler coupled with the preparedness to develop properties in emerging business related locations.

We make it our mission to be where customers need to be.

Consequently Quest offers guests a business class accommodation experience at rates that represent outstanding value for money at over 100 locations.

Quest understands the needs of business and business people

Our National account team is focused on servicing the corporate business market. Each team member is charged with the responsibility of clearly understanding a Client's needs so together with our franchisees we can meet those needs. We invest in ongoing market research to ensure we are in tune with broader business trends and any related potential impact on the travel and accommodation industry.

Close to where you need to be for business

Proximity to business location is very important. No one wants to travel long distances from their accommodation to get to meetings or have the added stress of facing a traffic jam along the way. That's why you will find a Quest strategically located in most business centers.

Why business people are thinking 'serviced apartment'

For many business people a week or weeks "on the road" is tough going. A Serviced Apartment provides the space to stretch out, conduct business meetings and even entertain with in-room dining. All the comforts needed to make that trip a little more pleasurable. A serviced Apartment also makes for a better bottom line.

Apartment accommodation is on the rise

The appeal of the serviced apartment concept is reflected in the growth of this type of accommodation.

The latest figures released by the Australian Bureau of Statistics reveal the supply of serviced apartment rooms increased by 8.5% in the 12 months to September 2005. Whereas hotel room supply increased by just 1.6 per cent over the same period.
